

Building High-Performing AI Teams

A Playbook for Scaling from 0 to 50+ Engineers

Team Growth Trajectory

Key Metrics Dashboard

Growth Phases

Phase 1

0-5

Foundation: Hire first engineers, establish culture, ship MVP

Phase 2

5-15

Growth: Scale structure, establish processes, ship production

Phase 3

15-30

Scale: Multi-geography, multiple teams, internal tools

Phase 4

30-50+

Maturity: Center of excellence, AI platform, next-gen leaders

Multi-Geography Structure

Hiring Process

3

Onsite Interview

4 hours - Full loop

4

Offer & Close

Negotiation, offer

Performance Metrics

Best Practices

Hire Slow, Fire Fast

Take time to find the right fit. Don't compromise on culture or skills. Act quickly when it's not working.

Document Everything

If it's not written, it doesn't exist. Create processes, playbooks, and runbooks for everything.

Small Autonomous Teams

Keep teams small (4-6 engineers). Give them ownership and autonomy to make decisions.

Async-First Communication

Don't expect immediate responses. Document decisions. Respect time zones. Over-communicate context.

Onboarding Timeline

1

Day 1: Orientation

Welcome meeting, HR paperwork, equipment setup, access to systems

2

Week 1: Technical Setup

Codebase walkthrough, architecture overview, first commit

3

Month 1: Ramp Up

Pair with buddy, first feature, participate in ceremonies

4

Month 3: Full Productivity

Own features, on-call rotation, technical decisions
